#### Ad V:

The present application satisfies the criteria set forth in Article 33(2) and 33(3) 1). PCT because the subject-matter of the claims is new and inventive in respect of prior art as defined in the regulations (Rule 64(1)-(3) PCT).

The documents cited in the Search Report do not disclose a process in which a specific peroxide having at least one terminal carbon-carbon double bond is reacted with a mixture of a polyolefin and a vulcanized rubber in order to get a thermoplastic elastomeric vulcanizate, or makes such a process obvious.

Also thermoplastic vulcanizates made according to the claimed process which contain the specific peroxide having a terminal carbon-carbon double bond within the molecule are novel and inventive.

Industrial applicability is given (Article 33(4) PCT).
